

YEAR 5/6 PSHE HOME LEARNING – Money Sense

How Can I Pay For Things?

Read

1. Think about the following questions:

- How could you pay for things when you are shopping?
- How do you know about this method of payment? Have you seen it used before?
- What would you use to pay for sweets in the local shop? Why?
- How do people pay in a supermarket?
- Why do you think they choose this method of payment?
- How do people pay if they buy something online? How do you know?

2. Use the following link to complete the Interactive quiz:

<https://natwest.mymoneysense.com/challenge/debit-and-credit-cards-uk/>

3. Go through the ppt of information related to this lesson's learning.

Reflect:

What are the advantages (pros) of using each of the following payment methods, and what are the disadvantages (cons)? Record your thoughts for each one in a table or a mind map:

- Cash
- Debit cards
- Credit Cards

Respond (Optional Extra Challenge!)

Complete the Activity Sheet 'Debit and Credit cards' to help the Williams family pay their bills.

Remember that the balance of the account is how much money is left in it after a payment has been made.

Remember also that you only need to change the balance if you are choosing to pay for an item with a debit card. If you choose credit card to pay for an item, the balance will stay the same as it was.

For more information on how to support your child's understanding of money access the Home Learning section of Natwest's Money Sense website:
