

# Rocks, soils and fossils.

## Rock formation

The foundation of a great rock collection is to identify your rocks by type. Geologists classify rocks into three basic groups based on how they were formed in nature.

The types of rocks are:

- Igneous
- Sedimentary
- Metamorphic

**Task 1 - Watch the video** <https://kidsloverocks.com/types-of-rock>

**Task 2 - create a poster or PowerPoint explaining the 3 types of rock and how they are each formed** Use key words, symbols and images to help.
